Publication No. U320030099647A1
GENERAL INFORMATION:
APPLICANT: Deshpande, Rajendra
APPLICANT: Tsai, Mei-Mei
TITLE OF INVENTION: Fully Human Antibody Fab Fragments with Human Interferon-Gamma;
TITLE OF INVENTION: Neutralizing Activity
TITLE REFERENCE: A-79
CURRENT APPLICATION NUMBER: US/09/972,656
CURRENT FILING DATE: 2001-10-05
NUMBER OF SEQ ID NOS: 135
APPLICANT: Hitz, Anna
APPLICANT: Boyle, William
APPLICANT: Soyle, William
APPLICANT: Sulivan, John William
TITLE OF INVENTION SELECTIVE BINDING AGENTS OF OSTEOPROTEGERIN BINDING PROTEIN
TITLE OF INVENTION SELECTIVE BINDING AGENTS OF OSTEOPROTEGERIN BINDING PROTEIN

WESOUR PARCH 101

Sequence 101, Application US/09424840

Patent No. 679038

GRIERAL INPORMATION:
APPLICANT: BENCHTOLD, Peter
APPLICANT: BENCHTOLD, Peter
TITLE OF INVENTION: Anti-GPIIS/IIIA Recombinant Antibodies
FILE REFERENCE: 100564.09049

CURRENT APPLICATION NUMBER: US/09/424,840

CURRENT FILING DATE: 1999-12-03

PRIOR PLING DATE: 1999-12-03

PRIOR PLING DATE: 1997-06-06

PRIOR FILING DATE: 1997-06-06

PRIOR FILING DATE: 1997-06-06

PRIOR FILING DATE: 1998-05-08

NUMBER OF SEQ ID NOS: 127

SOFTWARE: Patentin Ver: 2.1

LENGTH: 7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    60.5%; Score 23; DB 4; Length 7; 66.7%; Pred. Patent No. 5538525
GENERAL INFORMATION:
APPLICANT: BROEKAER, WILLEM F.
APPLICANT: CAMMUE, BRUNO P.A.
APPLICANT: CAMMUE, BRUNO P.A.
APPLICANT: SEBOK, RUBERT W.
APPLICANT: SEBOK, RUBERT W.
APPLICANT: TERRAS, FRANK R.G.
APPLICANT: VANDERLEYDEN, JOZEF
TITLE OF INVENTION: BIOCIDAL PROTEINS
NUMBER OF SEQUENCES: 59
CORRESPONDENCE ADDRESS:
ADDRESSEE: CUSHMAN DARBY & CUSHMAN STREET: 1100 NEW YORK AVENUE, N.W.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Description

Sequence 4, Application US/09514302

Patent No. 6339959

GENERAL INPORMATION:

APPLICANT: IGRASHI, Kazuaki

APPLICANT: IGRASHI, Katsuya

APPLICANT: ARA, Xuji

APPLICANT: KAWAI, Shuji

APPLICANT: KAWAI, Shuji

APPLICANT: KAWAI, Shuji

APPLICANT: ITO, Susumu

ITILE OF INVENTION: GENE FOR ENZYME HAVING BOTH ALKALINE PULLULANASE AND

ITILE OF INVENTION: ALKALINE ALPHA-AMYLASE ACTIVITIES

CURRENT APPLICATION NUMBER: US/09/514,302

CURRENT FILING DATE: 2000-02-26

BARLIER APPLICATION NUMBER: US/09/514,302

CURRENT FILING DATE: 1997-11-10

NUMBER OF SEQ ID NOS: 14

GENERAL INFORMATION:
APPLICANT: Tanzi, Rudolph E.
TITLE OF INVENTION: A Purified 20 kDa Presenilin 2
C-terminal Fragment and Methods of Screening for Compounds
that Inhibit Proteolysis of Presenilin 2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               0; Gaps

Patent No. 6221352
Patent No. 6221352
PAPPLICANT: HOWELL, MARK D.
APPLICANT: HOWELL, MARK D.
APPLICANT: CARLO, DENNIS J.
TITLE OF INVENTION: VACCINATION AND METHODS AGAINST DISEASES
TITLE OF INVENTION: RESULTING FROM PATHOGENIC RESPONSES BY SPECIFIC T CELL
TITLE OF INVENTION: POPULATIONS
NUMBER OF SEQUENCES: 75
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
                                                                                                                                                                                                      .

i Sequence 3, Application US/08055006
j Patent No. 64649778
i GENERAL INFORMATION:
APPLICANT: Brostoff, Steven W.
Wilson, Darcy B.
Smith, Lawence R.
Gold, Daniel P.
TITLE OF INVENTION: Vaccination and Methods Against Multiple
Scletcosis Resulting From Pathogenic Responses By Specific T
cell Populations
                                                                   APPLICANT: HOWELL, MARK D.
APPLICANT: BROSTOFF, STEVEN W.
APPLICANT: BROSTOFF, STEVEN W.
APPLICANT: BROSTOFF, STEVEN W.
APPLICANT: CARLO, DENNIS J.
TITLE OF INVENTION: VACCINATION AND METHODS AGAINST DISEASES
TITLE OF INVENTION: RESULTING FROM PATHOGENIC RESPONSES BY SPECIFIC T CELL
TITLE OF INVENTION: POPULATIONS
VIWHER OF SEQUENCES: 75
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    0
